HELLO THERE!

I am a former SAP developer with a passion for design. I am looking to use my analytical and communication skills to successfully transition as a front-end developer and produce one-of-a-kind websites.

Please visit www.linkedin.com/cvdsoto and www.github.com/cvdsoto for more information.

EXPERIENCE

WEB DESIGNER

FREELANCE

AUG 2016 - AUG 2019

I designed and presented webpage layouts and some collaterals for small business clients. I also presented mock-ups to the clients for approval and translate the design to HTML and CSS.

SAP DEVELOPER

NETLOGIC SOLUTIONS, ASIA INC.

JAN 2009 - APR 2019

As a senior developer, I monitored and assigned issues to a team of 3. As a junior developer, I was part of the implementation team and I resolved tickets given by the team leads as part of the support team, ensuring to deliver these on time.

CUSTOMER SERVICE TEAM MEMBER

WOOLWORTHS METRO

SEP 2019 - DEC 2019

I made sure to meet customers' needs through efficiently checking out items, handling returns, making coffee and other customer inquiries.

EDUCATION

GENERAL ASSEMBLY

FEB 2020 - MAY 2020

SOFTWARE ENGINEERING IMMERSIVE

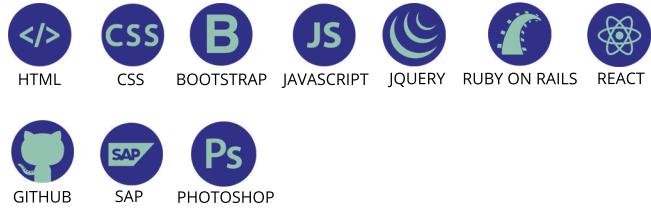

Enrolled in GA's 12-week Software Engineering Immersive course where I learned about HTML, CSS, JavaScript, jQuery, Ruby on Rails, React.

DE LA SALLE UNIVERSITY

MAY 2005 - SEP 2008

BS INFORMATION AND COMMUNICATIONS TECHNOLOGY MANAGEMENT

SKILLS

PROJECTS

RECIPE FINDER!

I made a site where you list down all the ingredients you have on hand and it will suggest recipes you can cook with. This site was created using HTML, CSS, JavaScript, and React.

'RONA SYMPTOM TRACKER

I was part of a team who created a symptom tracker for persons under quarantine for COVID019. This site was made by using HTML, Bootstrap, Ruby on Rails and React.

ULTIMATE CORON EXPERIENCE

I made a site for a travel agency that specializes in tours around Coron in the Philippines. It enables users to choose and reserve a tour with them. This site was made by using HTML, Bootstrap, Javascript, and Ruby on Rails.

TIC-TAC-TOE

I made a Red Velvet-themed tic-tac-toe because of my current obsession with KPOP. This game was made by using HTML, CSS, and JavaScript (jQuery).
